UTKARSH SHAH

Computer Science Undergraduate

itsutkarsh.2005@gmail.com • LinkedIn • Guna, India

Summary

I am a Computer Science undergraduate with hands-on experience in Google Cloud Platform and AI/ML technologies. As a Google Cloud Diamond League achiever, I have demonstrated expertise in cloud infrastructure, DevOps practices, and creating AI-powered applications. My educational background and practical internships equip me with the necessary skills to excel in tech environments.

Experience

AI Intern
Microsoft - AICTE Internship Program
Guna, India
05/2025 - 07/2025

Competitive internship program focused on AI technologies

- Specialized in advanced AI/ML technologies through competitive 4-week program
- Completed 40+ hours training in neural networks, NLP, and computer vision
- Selected among hundreds of applicants for AI-focused internship

Education

Bachelor of Technology in Computer Science
Jaypee University of Engineering Technology
Guna, India
08/2024 - 05/2028

Certification

Google Cloud Skills Boost - Diamond League — Achieved Diamond League with over 41,580 points

Cloud Digital Leader - Google Cloud — Certification awarded for understanding cloud infrastructure

Build Infrastructure with Terraform on Google Cloud — Learned to build infrastructure using Terraform on Google Cloud

Deploy Kubernetes Applications on Google Cloud — Focused on deploying Kubernetes applications on Google Cloud

Explore Generative AI with Gemini API in Vertex AI — Explored generative AI techniques using Gemini API in Vertex AI

Skills

C/C++ • CSS • Dataflow • Docker • GCP • Google BigQuery • HTML • Java • JavaScript • Kubernetes • NLP • Python • Service Cloud • SQL • TensorFlow • Terraform • Microservices • Gmail

Projects

Multi-Service Cloud Data Pipeline

Multi-Service Cloud Data Pipeline project focused on high throughput data processing

- Built end-to-end streaming data architecture processing 10,000+ messages/minute using Cloud Pub/Sub and Dataflow

AI-Powered Document Analysis System

AI-Powered Document Analysis System aimed at document processing

- Developed document processing app using Cloud Vision API with 95% accuracy
- Integrated Speech-to-Text API for audio transcription and NLP

Kubernetes Microservices Deployment

Kubernetes Microservices Deployment project focusing on effective service management

- Deployed 5+ containerized microservices on GKE with auto-scaling
- Implemented CI/CD pipelines using Cloud Build, reducing deployment time by 70%
